

WHY TO USE TOP-NOTCH ASSET TRACKING SYSTEM

TRACK ASSETS

Focus on your business growth, and use the software to keep an eye on your assets. Make detailed log for your equipment, upload your asset list into the system and start managing them in minutes.

MULTIPLE LAYOUTS

Not having your laptop is not an issue, and that will not affect your management tasks. Use your phone or tablet to scan barcodes, take pictures, check asset log, or assign them.

REPORTS

View ready to use template reports which include status about your assets to help clean up your workload. Add information about status, maintenance, check-out times, and more

NO EXTRA LICENSE

Our solution is part of M365 tenant. neither extra license, nor integration is needed. All tenant users can use the system with proper level of access

QR CODE SCANNING

Create custom QR Label to be printed and added to each asset. Moreover, scan QR Code using the mobile app and instantly update an asset in the field. The app is the perfect companion to stay in control of your assets.

CHECK IN - CHECK OUT & ASSET LOG:

Track your asset status from the day of purchasing, till it is deprecated. Every interaction will be recorded and logged to its asset. Get status Reports that analyze employees, asset tags, due dates, and assets that are past due at any time.

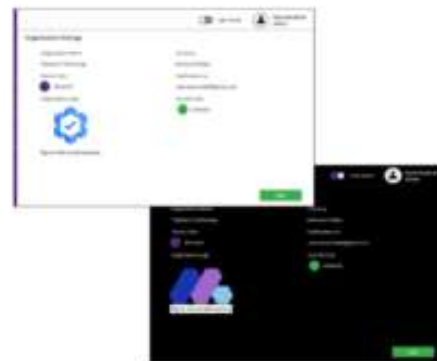

ROLE BASED SECURITY

Each user has a unique level of access: reviewer, Contributor and a full administrator. The system is suitable for everyone in the organization.

CUSTOMIZATION & BRANDING

Change the look and feel of the system to match it with your brand and add your logo to it. Have a consistent look for your system with easy steps at any time. Dark - Light mode is also there for better user experience
